Weekly Coal Production

Production for Week Ended:
January 23, 1993

Energy
Information
Administration

Summary

U.S. coal production in the week ended January 23, 1993, as estimated by the Energy Information Administration from railroad car loadings, totaled 19 million short tons. This was 6 percent more than in the previous week, but 7 percent lower than in the comparable week in 1992.

Production east of the Mississippi River totaled 11 million short tons, and production west of the Mississippi River totaled 8 million short tons.
